Update guide

FOR MITSUBISHI MOTORS VEHICLES ONLY

• <u>Version Update</u>

When the current system version is updated with a newer version update kit, a message stating that an update is currently occurring will be displayed the next time the system is used. Only a portion of specifications and data will be updated.

Note: <u>Only a portion of specifications change when the version update is performed. Information such as destinations, store locations, and AV source setting remain.</u>

Changes in the update are listed in the Summary Table on pages 2.3.4.
